State Allocation Board Meetings*

- » October 25, 2006
- » December 6, 2006

Implementation Committee Meetings*

- » December 1, 2006

Interest Earned Report (Form SAB 180)

- » Due quarterly (March 31, June 30, September 30
and December 31) from each county for all districts
that earned interest from the Leroy F. Greene
Lease-Purchase Program.

Deferred Maintenance Program (DMP):

- » Target SAB Date for application submitted
by June 30, 2006: December 2006
- » Application Submittal: June 30, 2007
- » Target SAB Date: December 2007

Annual Unused Sites Reporting

- » Certification of Unused Sites (Form SAB 423) due
June 30, 2007
- » Modification of Unused Site Status (Form SAB 424)
for each site with a modification due June 30, 2007

Reports Due On September 1, 2006

- » Community School Facilities Report (Form SAB 406C)
- » Expelled Pupils Facilities Report (Form SAB 406E)

* For the latest meeting dates, times and locations, check the
OPSC Web site.

from the desk of
Luisa Park, Executive Officer

It is with pleasure that I notify you that we are making strides in preparing the final regulations for the implementation of Chapter 35, Statutes of 2006 (Assembly Bill 127) with the anticipated approval of Proposition 1D. Key people involved in the vital endeavor of laying the groundwork have been meeting continually in subcommittees and regularly at the SAB Implementation Committee meetings. Many of you have been attending and actively participating at these meetings. Therefore, I would like to acknowledge the value and importance your input has provided. With this pace and the diligence that has been applied, the regulations for the Charter Schools Facilities Program, Small High School, High Performance Incentive Grants, and increase to the new construction grant were approved at the September State Allocation Board meeting. We will be taking regulations for the Overcrowding Relief Grant, Seismic and Career Technical Education Facilities Program after the November election. Your attendance and your voice are what has aided and assisted in this important process. We look forward to seeing you as these meetings continue.

With the availability of additional program funds on the horizon and the November ballot just around the corner, we have much to anticipate as these endeavors unfold. As always, it is a pleasure working toward meeting the needs of California school districts' facility needs.

Design and Site Apportionments

By Joel Ryan, OPSC Auditor

School districts that receive separate design and/or site apportionments, pursuant to School Facility Program (SFP) Regulation Section 1859.81.1, may not be aware that expenditures made with grant money provided by a separate design or site apportionment should be for costs appropriate to design or site, respectively.

For example, if the school district has received a separate apportionment for design, then the school district should only spend that grant for costs related to design. Some examples of design expenditures that a district may incur include, but are not limited to, architect or engineering fees, Division of the State Architect fees, California Department of Education fees, local agency plan check fees, and costs related to energy analysis, advertising for bids, printing of blueprints, and preliminary tests, such as soil or foundation tests. In some situations it may be necessary for the district to incur some planning related site costs such as site testing and appraisals. These expenditures would be allowed under both design and site apportionments. Purchasing sites with design funding however is prohibited.

Furthermore, separate site acquisition apportionments should only be used for costs related to site acquisition. Examples of site expenditures include, but are not limited to, the purchase price of the property, appraisal fees, escrow costs, site support costs, hazardous waste removal costs, surveying costs, and other site costs that include court costs, legal services, and condemnation.

The OPSC will review and audit all SFP projects, so it is important that the district spend its design and site grant money appropriately. For questions related to this topic, please contact a member of the OPSC Fiscal Staff or the district's OPSC Project Manager.

You Have Savings, Now What?

By Joel Ryan, OPSC Auditor

Once upon a time, in a district far, far away, news arrived that the bids for a school construction project came in much lower than expected. Often faced with cutting costs from construction projects in the past, district personnel were surprised and excited with the savings generated by the construction contracts and other cost categories in the project. Although the district wanted to spend its savings on other needs, it wanted guidance on what State law and regulations allowed with respect to the savings and how to keep track of the savings. That's where the OPSC Fiscal Staff stepped in...

The OPSC Fiscal Staff is here to respond to your concerns and help you through the audit process. First, in order to find out the total amount of savings on a project, use the equation below once the project is 100 percent complete and ready for closeout:

Savings equals State Grant plus District Match plus Interest Earned less Eligible Project Expenditures

Once the district has determined the total amount of savings for a particular project, by using the equation above, it may then calculate the district's and State's portion of that savings by pro-rating it in the same way that the district and State shared the original School Facilities Program (SFP) project funding. For example, if a SFP project is funded 50 percent by the State and 50 percent by the district, 50 percent is considered the State's portion of savings, and 50 percent is considered the district's portion of savings. The following will help the district determine how both the district's and State's portion of savings from a SFP project must be used and accounted for (pursuant to SFP Regulation 1859.103 and Education Code Section 17070.63):

For projects funded with financial hardship assistance, any savings must be returned to the State as follows:

- » The district's and State's portion of savings (if the district contributes some portion of funds to the project) must be used to reduce the financial hardship grant of the SFP project that generated the savings; or,
- » The district's and State's portion of savings must be used to reduce the financial hardship grant of a future financial hardship project. In this case, the district must report the expenditures annually, from the date of project closeout, using the Detailed Listing of Project Expenditure—Savings (located on the OPSC Web site by choosing "SAB Forms", and then "Expenditure Worksheet – Excel worksheet"). The district will have three years from the date savings was determined through the SFP expenditure audit to apply the savings to reduce the financial hardship contribution on a future project, or the district must reimburse to the State any unapplied savings, including interest accrued.

For projects funded by the State and district without financial hardship assistance (and the 60 percent commensurate requirement has been met):

- » The district's portion of savings may be used on other high priority capital facility needs of the district. This may include, but is not limited to, using the savings as a district match on another SFP project.
- » The State's portion of savings may be used on other high priority capital facility needs of the district. If using the State's portion of savings as a district match on another SFP project, that project must be of like-kind. For instance, savings from a new construction SFP project may only be used as a district match on another new construction SFP project and savings from a modernization SFP project may only be used as a district match on another modernization SFP project.
- » Once the SFP savings have been used, as described above, the district must report the expenditures annually, from the date of project closeout, to the OPSC using the Detailed Listing of Project Expenditure—Savings (located on the web as stated in the section above). The district may also report the savings expenditures before or during the project closeout.

Now that the district has used and accounted for its SFP Project savings, an important reminder is that the OPSC does track and audit savings. The district should keep detailed records to account for their savings usage. The OPSC may request, in addition to the Detailed Listing of Project Expenditures, invoices, contracts, and/or documentation identifying the project savings remaining in the restricted School Facility Program fund.

Finally, with the guidance of the OPSC Fiscal Staff, the district was able to spend and report accordingly. And, as in some tales, the district and the newly housed school children lived happily ever after!

Re-Designation of Energy Funds

by Don Littlefield, OPSC Project Manager

When modernization funds were exhausted in April of this year there remained a balance of approximately \$5.9 million in modernization energy funds. Without modernization funds available for appropriation, the remaining modernization energy funds would remain untapped. At the same time, energy funds for the new construction program were nearly exhausted. However, with \$3.2 billion in new construction funding remaining available, requests were expected to continue including requests for new construction energy funds.

For this reason, the Office of Public School Construction presented proposed regulations at the April 2006 State Allocation Board (SAB) meeting which would allow for the re-designation of energy funds from Propositions 47 and 55. These regulations were approved on August 21, 2006 by the Office of Administrative Law and give the Board the authority to re-designate modernization energy funds to the modernization fund and new construction funds to the new construction energy fund. In other words, the Board was given the ability to fund some modernization projects while also having the ability to fund new construction projects with energy efficient components.

At the September 27, 2006 SAB meeting, the Board authorized the re-designation of these funds. However, new construction funding approvals at the September Board exhausted all remaining Proposition 47 and 55 energy funds.

Project Tracking Number Needed for All SFP Applications

By Mary Lou Bailey, OPSC Analyst

The Office of Public School Construction (OPSC) wants to remind all school districts that it is necessary to include a Project Tracking Number (PTN) on all application submittals and for the purposes of tracking a proposed school facility project. To generate a PTN number, it is necessary to obtain your district's code and password. However, if you do not know the password, you may contact the OPSC at 916.445.3160 and one of the OPSC staff members will provide assistance.

Districts may create a PTN through the OPSC Web site at: www.opsc.dgs.ca.gov, under "Online Applications," Project Tracking Number Generator.

Adjustments to New Construction Baseline Eligibility for Additional Classrooms Provided After the Baseline

By Masha Lutsuk, OPSC Project Management Supervisor

At the September 27, 2006 meeting of the State Allocation Board (SAB), the Office of Public School Construction (OPSC) presented regulatory amendments that clarified and modified the requirements for reporting additional classrooms provided after the new construction baseline eligibility has been established. The OPSC has done so in response to the requests from the Board and school facilities stakeholders, which were thoroughly discussed at several meetings of the SAB Implementation Committee.

The guidelines for establishing and adjusting new construction baseline eligibility are contained in the School Facility Program (SFP) law and Regulations. The Education Code (EC) Sections 17071.10 and 17071.30 require an applicant school district to determine its existing school building capacity which shall be made on a one-time basis and used as the baseline for eligibility determination for new construction funding. Furthermore, EC Section 17071.75 establishes the formula for calculating the district's ongoing eligibility for new construction funding, which shall include any facilities provided from any state or local funding source after the existing school building capacity was determined. SFP Regulation Section 1859.51 specifies the types of adjustments that are permissible for purposes of calculating ongoing eligibility for new construction. The proposed amendments presented at the September 27, 2006 SAB meeting modified this and other sections to address the following three issues.

Issue 1: Clarifying language for the required adjustments to the new construction baseline eligibility

The proposed amendment to Regulation Section 1859.51(i) removes the reference to EC Section 17071.30, which was not specific and resulted in misinterpretation of the intent of the Regulations. Instead, the proposed amendment clarifies that the following classrooms do not have to be reported as additional classrooms provided after the new construction eligibility has been established:

- » State Relocatable Classroom Program portable classrooms,
- » Portable classrooms leased less than five years,
- » Portable classrooms leased more than five years when needed as interim housing on a single project (see below),
- » Facilities that were built or acquired for certain non-classroom purposes with funds specifically available for those purposes. These facilities may include regional occupational centers and programs, child care, preschool and adult education programs.
- » Portables counted in a district's existing building capacity that are subsequently replaced entirely with local funds and that are taken out of classroom use (see below).

Any classroom, whether permanent or portable that does not meet any of the conditions listed above, must be reported as additional capacity if it is leased, acquired or constructed after the new construction baseline eligibility has been established. Since the existing regulations can be interpreted otherwise and have been interpreted to mean that no portable classrooms have to be reported as additional capacity, the OPSC proposed to apply the proposed regulations prospectively for any new facilities for which contracts for the lease, purchase or construction are signed after the Board's approval of these regulations. The Board approved this proposal and will require any school district that signed a contract for acquisition, construction or lease of a portable classroom after September 27, 2006 to report the classroom as additional capacity provided.

It is the responsibility of each school district to report any additional classrooms that do not meet one of the exclusion criteria on the Form SAB 50-04, Application for Funding, each time the district files an application for modernization or new construction funding. Each

additional classrooms needs to be reported only once as soon as the district has signed a contract for acquisition, construction or lease of the classroom, unless the district plans to file a new construction funding application for the classroom prior to occupancy of the facility.

Issue 2: Portable classrooms leased for more than five years

Currently districts must report portables leased after the establishment of the existing building capacity once the portables have been leased for five years, whether in a single lease or cumulative total of several leases. These classrooms are then charged against the district's new construction baseline eligibility thereby reducing the district's ability to finance future projects to construct actual permanent classrooms. In many instances, it is conceivable that a project, from conception to occupancy, may take longer than a five-year period and therefore would require the continuation of the lease for the interim portables. Since the portables are and would continue to be leased on an interim basis, the classrooms would not be considered provided as required in statute to be charged against the district's new construction eligibility. Therefore, the proposed addition to Regulation Section 1859.51(i)(5) specifies that the five-year lease requirement shall be project specific and the district shall be eligible to continue to lease the classroom without a reduction to its new construction baseline eligibility for an additional time period as determined by the SAB, not to exceed three years. The SAB approved this amendment.

Issue 3: Locally funded replacement projects

Current SFP Regulations require an adjustment to the new construction baseline eligibility for any classrooms provided in a locally funded project, including the classrooms that replace existing facilities. School districts were concerned that this policy resulted in the reduction of eligibility for any future new construction projects and discouraged efforts to raise local funds for facility projects that districts may have considered outside of the SFP.

In response to these concerns, the OPSC drafted Regulation amendments to accommodate locally funded replacement projects without a reduction to the new construction baseline eligibility. The amendments also require an adjustment to modernization eligibility for any replaced facilities to ensure that these facilities do not continue to generate modernization eligibility.

In addition, Staff proposed changes to the financial hardship provisions of the SFP Regulations that would prohibit districts from seeking financial hardship assistance for a required period of time following the encumbrance of funds for replacement projects that are locally funded. This will require districts to consider the need for their matching share on future SFP projects when making expenditures on replacement projects. The proposed Regulations recognize that it is possible for a district to have an emergency situation that requires a facility replacement. In such cases, the Board may determine that the replacement of facilities with local funds should not preclude the district from seeking future financial hardship assistance. The regulatory changes presented to the Board apply to both permanent and portable classrooms and facilities. The SAB approved this proposal as well and determined that a five-year period is most appropriate for a school district to be ineligible for financial hardship assistance when local funds were used to replace existing facilities.

The SAB has authorized the OPSC to submit the revisions to the SFP Regulations to the Office of Administrative Law (OAL) for approval. The Regulations are anticipated to be approved by the OAL in four to six months. To view the text of the proposed Regulations, please refer to the OPSC Web site. If you have questions about the amendments and how these provisions apply to your district, please contact your OPSC Project Manager.

Regulations Approved for the Additional Grant for General Site Development

By Karen Sims, OPSC Project Manager

The regulations for an additional grant for general site development have been approved by the Office of Administration Law on an emergency basis and are now in effect. The amendments include an increase of six percent to the new construction base grant allowance for elementary and middle school and a 3.75 percent increase for high school projects. Only new school projects or projects that are additions to existing sites acquiring acreage are eligible. Eligible projects also receive \$19,200 (\$9,600 State share) per new acre being acquired. This amount is adjusted annually based on the change in the Class B Construction Cost Index (CCI). Adjusted to the 2006 CCI, the amount is \$26,112 (\$13,056 State share) per acre.

Projects funded at the June 2006 State Allocation Board (SAB), and any subsequent meeting, that meet the requirements are eligible for funding. A mass mailer has been sent to those school districts that were apportioned at the June, August, or September SAB meeting that may qualify for the grant. In order to receive the additional grant, school districts must complete and return the form attached to the mass mailer. If the form is not returned within the required amount of time, the district may not receive the additional grant. If a school district has recently submitted an application for new construction funding, the issue will be addressed in the 15-day letter. The updated Application for Funding (Form SAB 50-04) including the general site request is now available on the Office of Public School Construction (OPSC) Web site to be used for any new submittals.

The approved regulations also include a sunset provision stating that the additional grant for general site will sunset no later than January 1, 2008. This provision allows the OPSC to complete its analysis on the adequacy of the new construction grants and the impact of Assembly Bill (AB) 127.

A report was also presented at the September 2006 SAB meeting addressing the issue of a general site grant for additions to existing projects that are not acquiring acreage. Even though general site work is often included in these projects, since land is not being acquired, the work included is typically not as extensive as the work included in new school projects or additions that are acquiring acreage. The analysis to determine whether the funding provided by the SFP is adequate for addition projects, including the impact of the grant increases provided by AB 127, should it be approved, is continuing. Until the study is complete, a recommendation on whether to provide a general site grant for these projects cannot be made.

Please contact your OPSC Project Manager if you have additional questions or need assistance.

Alternative Education Classroom Loading and Funding Report

By Eric Bakke, OPSC Project Manager

At the February 2006 State Allocation Board (Board) meeting, the Office of Public School Construction (OPSC) presented a report on the adequacy of the funding method utilized under the Alternative Education Program. It was reported that there was insufficient data to make a determination on the funding adequacy due to the fact that these projects were still very early in the application/funding process. Thus, the Board directed staff to bring back a report when the close-out audits have been completed for the projects that were apportioned. Additionally, the Board requested that the OPSC provide an update on the current status of the loading standards for the Alternative Education Program.

In August 2006, the OPSC presented such a report and recognized that the loading standard issue has been in discussions for quite some time and that there is a need to resolve this issue. However, there are a couple of factors that preclude the OPSC from presenting a conclusive recommendation to the Board at this time. Prior to having any further discussion, Staff must have an opportunity to analyze the information resulting from the close-out audits.

In addition, the OPSC has dedicated its staff resources on the implementation of Assembly Bill (AB) 127, Chapter 35, Statutes of 2006. AB 127 has an urgency clause that requires regulations be ready for implementation in the event the voters of California approve the bond act in November. Therefore, staff resources have been directed to prepare discussion items and proposed regulations for Implementation Committee meetings in anticipation of the November ballot.

Staff did propose to bring the classroom loading standard and funding issues before the Implementation Committee once staff resources are once again available and there is sufficient funding data to review. So, please check the OPSC Web site in the coming months to learn when this item will be presented to the Implementation Committee.

Eligibility of Potential Joint-Use Projects

Brian LaPask, OPSC Project Management Supervisor

The most recent Joint-Use Program funding cycle has come to a successful close with approximately \$35.4 million worth of projects being funded at the August 23, 2006 State Allocation Board (SAB) meeting! Also, the SAB approved the OPSC's recommendation to apportion the nine remaining unfunded projects, worth \$11.2 million, at a future SAB meeting with future joint-use bond funds should Proposition 1D pass or via a transfer of funds from the State Relocatable Classroom Program.

With the possibility of additional joint-use funds being available soon, there are a few things districts should be aware of in order to apply for any future joint-use projects:

Districts can apply for "Type I" joint-use projects in conjunction with an application for new construction grants to build a new school through the School Facility Program (SFP). Type I projects are intended to fund any "extra area" or "extra cost" associated with the project only.

Eligibility for stand alone or "Type II" joint-use projects is predicated on a district having a school site that either does not have the type of facility they are requesting, or the existing facilities are inadequately sized. An existing facility would be considered inadequate if it is less than 60 percent of the square footage needed to serve the pupils on site.

In order for a district to qualify for a Type II project, the site where the project is to be constructed must be a site that was not newly constructed using SFP new construction funds. When a district applies for grants to build a new school, the base grants not only include dollars to build classrooms, but also any minimum essential facilities that a school would need. For this reason, any potential joint-use project at a site newly constructed with SFP new construction dollars would be essentially already funded at the time of the SFP new construction application and would therefore be deemed ineligible for funding.

For more information regarding the Joint-Use Program please visit the OPSC Web site at <http://www.opsc.dgs.ca.gov>. You may also contact either Brian LaPask at 916.327.0298, or via email blapask@dgs.ca.gov, or Randy Laborde at 916.322.9449 or rlaborde@dgs.ca.gov.

CEQA Expenditures, Are They Eligible?

By Joel Ryan, OPSC Auditor

As an integral part of acquiring a site for the construction of a new school, or an addition to an existing school, California school districts must get a final site approval from the California Department of Education (CDE). One of the requirements for CDE site approval is the school district's completion of the California Environmental Quality Act (CEQA) process before site acquisition. Furthermore, the district may be required to provide evidence of completed CEQA requirements to the OPSC to assure that the district has made substantial progress, pursuant to School Facility Program (SFP) Regulation Sections 1859.105(b)(2) and 1859.105.1(a)(2). Along the way, school districts may incur expenses, beyond the purchase of the site, that are related to CEQA [Public Resources Code Section 21000 et seq.].

It has come to the attention of the OPSC that school districts would like to know whether or not the expenditures related to CEQA requirements are eligible under the School Facility Program (SFP). As long as the expenditures associated with CEQA are not for services rendered by school district personnel, they are eligible expenditures. When the school district submits the Expenditure Report (Form SAB 50-06), these CEQA-related expenditures should be reported on the accompanying Detailed Listing of Project Expenditures, in the column under 'Site Support Costs'. Additionally, as with any expenditure, the district should keep track of all of the appropriate backup documentation (e.g., invoices, warrants, etc.). This documentation may assist the district to later substantiate the expenditure during the audit close-out of the project.

The OPSC Fiscal Staff aims to assist school districts with questions concerning what project costs are eligible or ineligible. When these questions arise, school districts that are currently working with an auditor on an audit close-out may contact that auditor for help. Otherwise, please contact the school district's OPSC Project Manager who can help to address the concern with a member of the OPSC Fiscal Staff.

AS OF SEPTEMBER 27, 2006

Proposition Funds Put to Work

PROGRAM	BOND ALLOCATION	APPORTIONED	RELEASED/CONTRACTED
PROPOSITION 55			
New Construction	\$ 4,960,000,000	\$ 2,177,018,082	\$ 1,724,206,236

Dedication and Groundbreaking Ceremonies

By Darlene J. Newman, OPSC Project Manager

The Office of Public School Construction (OPSC) would like to congratulate the following districts for their school dedication and groundbreaking ceremonies.

SCHOOL DISTRICT	COUNTY	PROJECT	DEDICATION
Los Angeles Unified	Los Angeles	Central Los Angeles High School #10	September 2006
Los Angeles Unified	Los Angeles	Central Los Angeles Middle School #3	September 2006
Hayward Unified	Alameda	Stonebrae Elementary School	September 2006
Merced City	Merced	Joe Stefani Elementary School	October 2006
Ceres Unified	Stanislaus	Joel J. Hidahl Elementary School	October 2006
Ceres Unified	Stanislaus	La Rosa Elementary School	October 2006
Desert Sands Unified	Riverside	Ronald Reagan Elementary School	October 2006
Los Angeles Unified	Los Angeles	Banning New Elementary School #1	October 2006
Los Angeles Unified	Los Angeles	Central Los Angeles New Middle School #4	October 2006
Los Angeles Unified	Los Angeles	Huntington Park New Elementary School #7	October 2006
Los Angeles Unified	Los Angeles	Maywood Academy High School	October 2006
Los Angeles Unified	Los Angeles	Wilshire Park Elementary School	October 2006
SCHOOL DISTRICT	COUNTY	PROJECT	GROUND BREAKING
Kern High	Kern	Mira Monte High School	July 2006
Kern High	Kern	Independence High School	July 2006
Los Angeles Unified	Los Angeles	Central Los Angeles High School #9	September 2006

Did you know that you can highlight your district's new school dedications and groundbreaking ceremonies in the *Advisory Actions* newsletter? To have your event highlighted, please notify the OPSC, include all information as referenced in the table above, and please include the related School Facility Program application number. Submit this information to the OPSC, Attention: *New School Dedications and Groundbreakings*.

AS OF SEPTEMBER 27, 2006

Note: Amount shown above are in millions of dollars. The SAB approved \$511,207.41 for the Deferred Maintenance Program.

Regulations Update

Typically, emergency regulatory tracts take approximately 30–45 days to become an effective emergency regulation after they are approved by the State Allocation Board (SAB) and prior to filing with the Office of Administrative Law. Non-emergency regulatory tracts take 120–180 days from the date the SAB approves the agenda item until the regulation(s) become effective.

The following regulation amendments were approved at the August 23, 2006 State Allocation Board meeting.

Accessibility Requirements and Grants for Modernization Projects

BY KAREN SIMS, OPSC PROJECT MANAGER

At the May 2006 State Allocation Board (SAB) Meeting, the Division of the State Architect (DSA) presented a report regarding the impact of accessibility requirements on modernization projects. A summary of this report is provided in Issue No. 3 of the Advisory Actions. Based on the report, the Board requested that Staff present proposals to the Implementation Committee (Committee) regarding the excessive cost grant for access compliance requirement on modernization projects.

Proposed regulations were presented at the July 21, 2006 and August 3, 2006 Implementation Committee Meetings to change the manner in which the excessive cost hardship grant for accessibility and fire code requirements is calculated. Currently, School Facility Program (SFP) Regulation Section 1859.83(f) stipulates that a district's modernization project is eligible for an amount equal to three percent of the modernization base grant for handicapped access and fire code requirements. Instead of the current three percent increase to the modernization base grant, Staff proposed that the excessive cost hardship grant be reviewed on a project-by-project basis and that the amount of the grant be determined based on the actual eligible hard costs to complete the minimum accessibility work required as determined by the DSA and the Office of Public School Construction (OPSC).

This proposal was presented to the SAB at its August 23, 2006 SAB meeting. The SAB approved the regulations on an emergency basis and modified the OPSC's recommendation by requesting that districts also be given the option of choosing the original three percent base grant augmentation or the proposal based on the actual minimum accessibility work necessary as determined by the DSA. The Board also requested that the grant be revisited in one year's time.

Some may ask then...

When can I request the grant under the new proposal?

The new option for the accessibility grant can be requested once the emergency regulations are approved by the Office of Administrative Law (OAL).

What do I have to do in order to request the grant?

In order to request the grant, the Architect of Record must prepare a detailed listing, including costs, of all of the accessibility work included in the contract documents. The detailed listing must be submitted to the DSA with the plans and specifications of the project. The DSA will review the listing and verify the accessibility work included in the project that is the minimum work necessary to receive approval from the Access Compliance Unit (ACU) of the DSA. The ACU will approve the listing with a signature of the DSA or contracted plan reviewer. This listing must then be submitted with your complete SFP modernization grant request to the OPSC. The Application for Funding

(Form SAB 50-04) has been modified to incorporate either grant option. The OPSC will review the approved listing and ensure that the reported costs of the minimum work deemed necessary by the ACU is reasonable.

What if my modernization plans are currently being reviewed by the DSA, can I still request the grant?

A district may request the grant, however, the detailed list described above must be provided to the ACU.

What if my modernization grant application has been submitted to the OPSC, can I still request the grant?

A district may request the grant only if the project application is first withdrawn, re-submitted to the ACU with the list described above, and then resubmitted to the OPSC once the list is approved by the DSA and the regulations are approved by the OAL.

How is the proposed accessibility grant determined?

At the time of the conversion from the Lease-Purchase-Program to the SFP, it was the intent that a portion of the modernization base grant cover access compliance work. Therefore, when determining the amount of the excessive cost hardship grant for access compliance, seven percent of the modernization base grant will be considered available funds for access compliance. The excessive cost hardship grant for access compliance will be the difference of the actual hard costs required and verified by the DSA and the OPSC subtracted by seven percent of the sum of the State and district share of the project's modernization base grant, not to exceed the cap as described below.

Title 24 requires that if the construction cost of a modernization project exceeds 50 percent of its replacement cost, the building must be brought into compliance with the current building code; therefore, the maximum a school district can receive for access compliance is the difference between the new construction base grant (which represents approximately 50 percent of the replacement cost) and the sum of the State and district share of the modernization project's base grant.

The chart below illustrates how the excessive cost hardship grant cap is calculated based on one pupil grant, and how the seven percent is applied:

Calculation of Maximum Grant (Cap) – Based on One Elementary Pupil

State and District Share of New Construction Base Grant at 50 Percent	subtract	State and District Share of Modernization Base Grant	equals	Maximum Grant Allowable for Accessibility Requirements
\$7,082		\$5,098		\$1,984

Examples of Calculation of the Excessive Cost Hardship Grant

If the Minimum Accessibility Work Verified by DSA is:		7 Percent of State and District Share of Modernization Base Grant		Difference	Excessive Cost Grant @ 100 Percent
\$2,000	<i>subtract</i>	\$357	<i>equals</i>	\$1,643	\$1,643
\$2,500	<i>subtract</i>	\$357	<i>equals</i>	\$2,143	\$1,984 (cap)
\$ 350	<i>subtract</i>	\$357	<i>equals</i>	-\$ 7	\$ 0

What if I'm not modernizing my buildings, but rather choosing to replace them in like-kind as allowed pursuant to Regulation Section 1859.79.2(a)(1)?

A modernization project that consists of replacement in like-kind will be eligible for an excessive cost hardship grant equal to three percent of the modernization base grant only.

If I have a modernization funding application that was approved and placed on the "Unfunded List", can I request the new option for the accessibility grant?

If a modernization project currently is on the Unfunded List and the school district wishes to utilize the proposed calculation for the additional grant for accessibility, the district may withdraw the project and re-submit it once the regulations are approved by the OAL. As a reminder, if the district chooses to re-submit a project, that project will receive a new date in line.

This is the second issue of our supplemental insert providing an update on the implementation of Assembly Bill (AB) 127. We hope you found the first issue to be informative. All of the grant and program provisions contained in AB 127 introduced in the first issue have been presented and discussed at length at one or more meetings of the State Allocation Board (SAB) Implementation Committee (Committee). In fact, the implementing regulations for the following provisions have already been presented and approved by the Board at its September meeting:

- » High Performance Incentive Grants
- » Small High School Program
- » Charter Schools Facilities Program
- » New Construction Grant Increase

The following provisions are still being discussed at the Committee and are anticipated to be completed in the next several months:

- » Seismic Mitigation
- » Overcrowding Relief Grant
- » Career Technical Education Facilities Program

If you would like additional details regarding a particular provision, the Committee Issue Papers can be located on the Office of Public School Construction (OPSC) Web site: www.opsc.dgs.ca.gov. We welcome any feedback or suggestions you might have.

The OPSC and California Department of Education (CDE) will be conducting workshops in November and December for the items approved at the September SAB should Proposition 1D pass. We will notify you once the dates, locations, and times are set for the workshops.

K-12 EDUCATION FACILITIES

2006 Bond Proposal

LEGEND PROGRAM

-  New Construction*
-  Modernization*
-  Charter Schools
-  Career Technical Education
-  Joint Use Projects
-  Overcrowding Relief
-  High Performance Schools

FUNDING PROPOSAL

\$ 1,900,000,000 †
3,300,000,000
500,000,000
500,000,000
29,000,000
1,000,000,000
100,000,000
TOTAL
\$ 7,329,000,000

*No more than \$200,000,000 of the sum of the appropriations for new construction and modernization shall be used to fund the smaller learning communities and small high schools.

† Up to 10.5 percent shall be available for purposes of seismic repair, reconstruction, or replacement, pursuant to Section 17075.10.

Discussion regarding the High Performance Incentive Grant, Small High School Program, Charter School Facilities Program, and Increase to the New Construction Grant at the Committee meetings has concluded. Following is a summary of the regulations that were approved by the SAB at its September meeting for these provisions within AB 127:

HIGH PERFORMANCE INCENTIVE GRANT

AB 127 provides additional new construction and modernization High Performance Incentive Grants in the amount of \$100 million for the use of designs and materials that promote the efficient use of energy and water, natural lighting and indoor air quality and recycled materials.

The High Performance Incentive Grant will be determined by the High Performance Rating Criteria (HPRC) point system of the Collaborative for High Performance Schools (CHPS) which was recommended by the California Schools Workgroup of the Governor's Green Action Team to encourage schools built with State funds be resource and energy efficient. A district can achieve points for a project by meeting and exceeding the HPRC criteria in the following six categories:

- » Sustainable Sites
- » Water
- » Energy
- » Materials
- » Indoor Environmental Quality
- » District Resolutions

In each of these categories, there are one or more subcategories, referred to as "classes", that contain prerequisites and optional credits. Points are assigned to each credit. There are 85 total points possible to be obtained. The points are tallied on a CHPS criteria scorecard. For more detailed information on the HPRC and how the points are calculated, please visit the Web site: <http://www.green.ca.gov/InfoSchools.htm>.

Since the High Performance Incentive Grant is an incentive-based grant, the Board approved covering the entire upfront costs of design and materials of a high performance school to be shared equally between the State and the district. The advantage of this option is that upfront costs would be fully covered and the district would not have to wait for the life cycle (savings resulting from the inclusion of these high performance attributes) to cover the additional expenses incurred. This option is also anticipated to result in greater district participation in the use of designs and materials that include the attributes of high performance schools.

The number of points received for a project will dictate the amount of the High Performance Incentive Grant. A district's new school project must meet all prerequisites of the HPRC. In addition, if the project has been accepted by the Division of the State Architect (DSA) prior to August 24, 2007, the points standard must be within the range from 28 to 81 points in compliance with the 2002 Criteria Edition of CHPS. A district, however, may volunteer to utilize the 2006 Criteria Edition of CHPS. If the project has been accepted by DSA on or after August 24, 2007, the points standard must be within the range from 32 to 85 points.

The DSA will review the proposed project, and if they concur with the points specified in the HPRC, for those new school projects accepted by DSA prior to August 24, 2007, the High Performance Incentive Grant will be determined by multiplying the New Construction Grant by:

- » 2 percent at 28 points plus 0.06 percent for each point attained from 29 through 33 points; or
- » 2.35 percent at 34 points plus 0.24 percent for each point attained from 35 through 40 points; or
- » 4 percent at 41 points plus 0.36 percent for each point attained from 42 through 54 points; or
- » 9.05 percent at 55 points plus 0.060 percent for each point attained from 56 through 81 points.

For those new school projects accepted by DSA on or after August 24, 2007, the High Performance Incentive Grant will be determined by multiplying the New Construction Grant by:

- » 2 percent at 32 points plus 0.17 percent for the point attained at 33 points; or
- » 2.35 percent at 34 points plus 0.24 percent for each point attained from 35 through 40 points; or
- » 4 percent at 41 points plus 0.36 percent for each point attained from 42 through 54 points; or
- » 9.05 percent at 55 points plus 0.060 percent for each point attained from 56 through 85 points.

New construction addition projects and modernization projects must meet the prerequisites in the categories that are within the scope of the project. In addition, at least 25 points must be earned. The DSA will review the proposed project, and if they concur with the points specified in the HPRC, the High Performance Incentive Grant will be determined by multiplying the respective New Construction or Modernization Grant by:

- » 2 percent at 25 points plus 0.035 percent for each point attained from 26 through 33 points; or
- » 2.35 percent at 34 points plus 0.24 percent for each point attained from 35 through 40 points; or
- » 4 percent at 41 points plus 0.36 percent for each point attained from 42 through 54 points; or
- » 9.05 percent at 55 points plus 0.060 percent for each point attained from 56 through 81 points.

If there are no funds remaining in the High Performance School Account or the funds remaining in the High Performance School Account are insufficient to fully fund the additional grant, the district will be given the option of withdrawing its application and resubmitting it should additional funds be made available, or continuing with the project and accepting a full and final apportionment without the additional grant.

Although the Board approved the regulations, a representative from Global Green, an advocate for high performance measures, proposed additional grants of \$50,000 above and beyond the funding approved by the Board for purposes of meeting two of the following criteria: 1) improved student performance; 2) reduction in long-term operating costs; and 3) enhanced environmental benefits. Examples of these criteria include superior indoor air quality, superior daylighting, classroom acoustical performance, renewable energy installations, enhanced commissioning, edible gardens, and participation in the California Climate Action Registry. All of these items except for the last two are included in the rating criteria of the CHPS. The task force that

helped develop the High Performance Incentive grant decided that Global Green's issues are better suited for discussion with CHPS for consideration. For example, when these specific criteria are met, the number of points that may be garnered could be increased, thereby qualifying the project for an increased grant. The board, however, requested the OPSC reconsider Global Green's proposal and to bring back a recommendation to the Board.

Concerns were also expressed that the grant being recommended was insufficient to cover the entire upfront costs. The OPSC agreed to monitor the grant and costs to ensure that the grant fully funds the high performance measures, and to provide an update and recommendation to the Board should an adjustment to the grant be warranted in approximately a year's time.

SMALL HIGH SCHOOL

AB 1465, Chapter 894, Statutes of 2004 (Chan) created a pilot program within the SFP that provided districts access to \$20 million for the purpose of constructing new small high schools and \$5 million for the reconfiguration of existing high schools into two or more smaller high schools that would foster academic achievement and success in a small high school environment. The Small High School Program commenced on January 1, 2006 and remains in effect until January 1, 2008.

AB 127 allocates up to \$200 million for the new construction and reconfiguration of small high schools. As a result, an additional funding cycle was created. The \$200 million will remain in one fund for both new construction and modernization (reconfiguration) to afford more flexibility in the allocation of the bond funds.

Current School Facility Program (SFP) Regulation Section 1859.93.2(c), New Construction Adjusted Grant for the Small High School Program, requires that: "The Small High School must be constructed on a stand alone site with no existing facilities." While the intent of this program was to create self-contained small high schools, many districts have cited that the inclusion of core facilities renders the feasibility of such construction as cost prohibitive. In an effort to generate more interest and greater participation in the program, the OPSC therefore recommended, and the Board approved, regulations modifying the existing pilot program as follows:

- » Districts will still be required to build stand alone small high schools on new sites; however, if the small high school is located adjacent to an existing high school which includes core facilities, students from the small high school will be allowed to use those core facilities.
- » A district may use a portion of an existing large high school site to build a small high school if the CDE determines that the creation of the small high school does not create a school with an inappropriate number of pupils in relation to the size at either site. The small high school must have a separate CDS code and administration but the small high school may share facilities with the existing high school.
- » Shared core facilities may include, but not be limited to, multipurpose rooms, gymnasiums, and libraries. Districts will not be allowed to share administration and toilet area.

The proposed regulations also modify the limit of \$500,000 for the purposes of reconfiguration of a large high school into two or more small high schools. Since a high school of 1000 or more pupils must be reconfigured into two or more smaller high schools, it was determined that is not equitable that a high school that is reconfiguring into five small high schools receive the same amount of reconfiguration funds as a high school reconfigured into two small high schools. Therefore, the revised regulations provide that each new small high school created may be eligible to receive up to \$500,000 for the purpose of reconfiguration.

CHARTER SCHOOLS FACILITIES PROGRAM

AB 127 makes modifications to the Charter Schools Facilities Program (CSFP) should the voters approve an additional \$500 million as part of the bond package that will be presented in November 2006. The regulations approved by the Board contain eight major areas of interest that were of concern to stakeholders and/or were modified as a result of AB 127, as follows:

New Construction Eligibility Requirements. AB 127 changes the new construction eligibility requirements for the CSFP. A school district does not have to demonstrate new construction eligibility in order for a charter school project to be submitted or apportioned.

Certification Requirements. AB 127 requires that a district must certify to the number of district unhoused students that will be housed in a new charter school project. The district's new construction eligibility will be adjusted according to the number, certified to by the district, of the district's unhoused students that will attend the charter school. The district will be required to determine the number of district unhoused pupils that will be served by the proposed project that must be taken as an action item to a regularly scheduled board meeting. A resolution, signed by a board member, and supporting documentation will be required to be submitted within 60 days of the district having been notified by the charter of its intention to apply for new construction funding.

Rehabilitation Component. AB 127 provides for funding to rehabilitate buildings that are at least 15 years old. For purposes of the CSFP, the definition of "Charter Schools Facilities Program Rehabilitation" was presented as being substantially identical to the definition of work in a modernization project. Rehabilitation work may include, but would not be limited to, structural changes or other types of work on an existing district facility that extended the useful life of or enhanced the physical environment of the school. A district could apply for funding on behalf of a charter school or a charter could apply independently as long as there was an agreement with the district in place at the time the preliminary apportionment application was submitted.

Rehabilitation funding will be based on the square footage dollar amounts currently used in the Joint Use and Facility Hardship Rehabilitation programs, up to the amount that would be otherwise be provided for a new construction project. The State will provide 50 percent of the funding and charter schools will provide a matching share. To comply with the new law, the preference point system used to score applications will be adjusted to give preference to rehabilitation projects.

The facilities to be rehabilitated will be considered modernized. Therefore, appropriate adjustments to the modernization eligibility will be required. If a school site had not established eligibility, the rehabilitated building would be considered modernized for purposes of future modernization eligibility establishment. For school sites that had established eligibility, but had not received modernization funds, the eligibility would be adjusted to exclude rehabilitated buildings. For school sites that had established eligibility and used a portion of it, the rehabilitation grant would be offset by the previous amount of modernization funding that had been received. School sites that had exhausted their established eligibility would not be eligible for CSFP rehabilitation funding.

Both permanent and portable buildings will be eligible, but if a Minimum Essential Facility (MEF) such as a multi-purpose room or a gym is reconfigured into classrooms, the MEF will have to be replaced with no additional funding. Lastly, any work done in a rehabilitation project that had previously been placed on the district's five-year Deferred Maintenance Plan will have to be removed from it.

Filing Period. Since concerns were raised that charters may need more time to explore the new rehabilitation component of the law, the filing period was postponed to commence 90 days after the passage of the bond act.

Preference Points. The determination of the preference points were revised to incorporate the statute which requires that consideration be given for the use of existing facilities. The preference point system was reviewed and each category in which points can be obtained was modified and capped at 40 points. The number of overcrowding points that can be garnered, however, is limited based on a percentage of the number of unhoused pupils that will be certified by the district as being housed by the project.

Charter School Agreements. Projects in all rounds of funding will require the execution of three agreements prior to the release of funds, including design funds. These agreements include a Memorandum of Understanding between the State, school district and charter, which outlines the roles and responsibilities of all parties involved in the CSFP project; a Funding Agreement, which sets forth the repayment terms of the local matching share amount; and the User Agreement, which is created and entered into by the school district and charter school. The first two Charter School Agreements must be executed by the State; the User Agreement is reviewed by the California School Finance Authority. The required signatories for each agreement are indicated in the chart below:

DOCUMENT	SIGNATORY		
	STATE	SCHOOL DISTRICT	CHARTER SCHOOL
Memorandum of Understanding	×	×	×
Funding Agreement	×		×
User Agreement		×	×

For purposes of these agreements, the State is both the SAB and the California School Finance Authority.

Removal of Funding/Acreage Caps. AB127 removes all project funding caps, limits on the number of pupils, and caps on the site acreage. The CDE will provide estimated recommended acreage prior to a charter submitting a preliminary apportionment application. The new law also allows for an inflation factor and other additional grants afforded to typical SFP funding applications.

Additional Issues. Project savings cannot be used toward the charter school's matching share. Also, the law specifies that school districts and charters must consider existing facilities pursuant to Proposition 39. Therefore, a certification that the consideration took place has been added to the application for a preliminary apportionment. A project description will also be required as part of the application in order to provide a better understanding of the project for both the charter school and the OPSC. In addition, the definition of "general location" will change to provide more flexibility, all calculations will be rounded using traditional rounding ("0.5" and above, round up), and the information collected for the low-income determination will remain the data that is collected in October and on file with CDE.

A new tie breaker methodology for applications received on the same day, which have the same number of preference points, was also introduced. The first tie breaker is to provide the preliminary apportionment to an applicant that had not been previously funded under the SFP, CSFP or the Charter School Facilities Grants Incentives Program. Other remaining tie breaker categories to fund applications that will be used are: preference to the applicant that is using existing facilities, then those that relieved overcrowding, and finally to a lottery system.

INCREASE TO THE NEW CONSTRUCTION GRANT

EC Section 17072.11 requires the "per-unhoused-pupil grant eligibility" as determined under subdivision (a) of Section 17072.10 to be increased by seven percent for elementary and middle school pupils, and four percent for high school pupils, effective July 1, 2006, resulting in the following new construction grant amounts:

GRADE LEVEL	NEW CONSTRUCTION GRANT			
	1998 PER PUPIL BASE GRANT IN LAW	ADJUSTED 1998 PER PUPIL BASE GRANT W/PERCENTAGE INCREASE	CURRENT 2006 PER PUPIL BASE GRANT	NEW 2006 PER PUPIL BASE GRANT
Elementary	\$5,200	\$5,564	\$7,082	\$7,579
Middle School	\$5,500	\$5,885	\$7,490	\$8,015
High School	\$7,200	\$7,488	\$9,805	\$10,198

Apportionments made by the Board beginning with the July 26, 2006 SAB meeting will be increased accordingly provided Proposition 1D is approved by California's voters in November.

Starting January 1, 2008, the Statute also gives the Board the authority to annually increase the per pupil base grant amount by up to six percent, or reduce the per pupil base grant, by an amount determined based on an analysis of the current costs to build a school. Therefore, to capture the most current costs to construct schools, the regulations were revised to require school districts to submit data to the OPSC with the Fund Release Authorization (Form SAB 50-05) and the Expenditure Report (Form SAB 50-06) to conduct this analysis. The OPSC is developing a worksheet to collect this data. The OPSC will present the worksheet to the Board at a future SAB meeting.

The information requested on the worksheet will provide the data necessary for the OPSC to analyze current construction costs. Further, the OPSC will likely recommend that the Board take into account the current Construction Cost Index (CCI) adjustment when determining the percentage increase/decrease of the new construction base grant as the CCI measures the change in costs of labor and materials which will also be captured in Staff's independent analysis. Concerns were expressed with this approach, therefore, even though the OPSC will take into consideration the change in the CCI for that year when making its recommendation, the regulations provide the SAB with the option of increasing the grant up to the six percent maximum as provided for in the law.

STATE ALLOCATION BOARD

Implementation Committee

MAVONNE GARRITY, ASSISTANT EXECUTIVE OFFICER, STATE ALLOCATION BOARD

The following provisions are still being vetted at the Implementation Committee. Included is a summary of the main issues that have been discussed at the Committee.

SEISMIC MITIGATION

AB 127 provides up to \$199.5 million for seismic mitigation of the most vulnerable school facilities that are a Category 2 building that pose an unacceptable risk of injury to its occupants in the event of a seismic occurrence. AB 127 provides amendments to Education Code Section 17075.10 and the Facility Hardship Program.

Considerable discussion occurred on the definition of "the most vulnerable school facilities that are a Category 2 building (based on AB 300 evaluation) that pose an unacceptable risk". The Division of the State Architect (DSA) recommended at the August 18th Committee meeting that a methodology for determining the "most vulnerable" school buildings is needed. The DSA recommended that the methodology: 1) be the state of art for ranking the vulnerability of the building, 2) establish acceptable analysis procedures for structural engineers to use in evaluating building vulnerability, 3) establish definitive thresholds that must be exceeded to qualify as the "most vulnerable" buildings, and 4) not require substantial time or a high level of expertise for reviewing and approving submitted reports.

In order to develop comprehensive criteria for the most vulnerable Category 2 buildings, the DSA informed the Committee that they intend to survey a list of experts in seismic evaluation of buildings and to assist the DSA with:

- » Determining which of the Category 2 structural systems are the most vulnerable and pose an unacceptable risk.
- » Determining the minimum level of horizontal acceleration response of buildings with short periods of vibration (i.e., a 10 percent chance of being exceeded in 50 years) that must be exceed at the location of the building in order for the building to qualify for funding.

- » Determining a methodology for evaluating the actual strength of the building relative to the possible lateral loads it must resist (demand/capacity ratio). Then establish the value that must be exceeded in order for the building to qualify for funding.
- » Determining the best methodology for analyzing the demand/capacity ratio of the building.

Status: It is anticipated that the DSA will present information at the December 2006 Committee meeting to address specific criteria for determining the most vulnerable school facilities that pose an unacceptable risk for purposes of establishing qualifying projects in the seismic program.

OVERCROWDING RELIEF GRANT

AB 127 establishes the Overcrowding Relief Grant (ORG) and provides up to \$1 billion for this purpose. The ORG is intended to provide funding for the creation of additional open space via the reduction of portable classrooms on overcrowded sites by replacing them with permanent classrooms at the existing site or the construction of new schools or classrooms at other sites.

The proposal for the ORG was introduced at the September 7, 2006 Committee meeting and discussions resumed at the October meeting. There were several main issues discussed as follows:

Eligibility to Apply for the Grant

In order to apply for an ORG, a district must have a site that has a pupil population density equal to or more than 175 percent of the CDE's recommended pupil population density for that site. The statute requires that the calculation to determine the density be reduced to take into account multistory construction and new construction projects apportioned by the board, including Critically Overcrowded School (COS) Program projects. This calculation generated substantial discussion. It was agreed that the approved new construction apportionments to be reduced from the density calculation will include projects located a certain distance from the ORG eligible school (one mile for elementary schools and three miles for middle or high schools). This is based on the criteria used to determine eligibility for the COS Program. The OPSC recognizes that not all the new construction projects will address overcrowding relief; therefore districts will have the opportunity to submit a master plan or other data, such as demographic or attendance information, to reduce or eliminate the new construction adjustment.

Concerns were also raised with the adjustment to the school site pupil population density for any approved COS apportionments as some districts participating in the COS program stated that even though funds have been reserved for their use to relieve overcrowding, the fact that new construction eligibility is required will prevent the project from being constructed. Since COS projects cannot be withdrawn for four years, the OPSC agreed to consider the issue.

How the Project Will Relieve Overcrowding

Considerable discussion ensued around providing site acquisition grants to relieve overcrowding. It was expressed that the statute clearly contemplates students being moved from overcrowded sites to non-overcrowded sites or new sites to relieve overcrowding. In the end, site acquisition will be allowed under ORG.

Funding Cycles

Discussion also took place on how ORG projects would be funded. Initially, ORG funding was being recommended on a first-come first-served basis, however, the statute contemplated funding cycles by requiring semiannual funding. Therefore, three separate pots of money will be recommended. The amount of bond funds for each cycle has not been decided.

Reduction in the Number of Portables in a District

During the discussion on the requirement that districts certify that they will remove replaced portables from the district within six months of occupancy of newly constructed classrooms, it was stated that the replaced portables may be moved to non-eligible sites within the district if the portables are used as childcare or preschool facilities. It was suggested that portables also be allowed to be used for administration, storage, adult education, or other non-classroom purposes. These additional uses will be allowed provided the portables are placed on sites that are not overcrowded.

Status: Discussion will continue at the December 1st Committee meeting.

CAREER TECHNICAL EDUCATION FACILITIES PROGRAM

AB 127 establishes the Career Technical Education Facilities Program (CTEFP) and provides up to \$500 million for the program. The CTEFP is intended to provide funding for the construction or reconfiguration of facilities for career technical education.

The OPSC presented a synopsis of the proposed program framework at the August 18, 2006 Committee meeting and solicited Committee and audience input. The presentation focused largely on the facility funding aspect with the understanding that there was ongoing discussion between OPSC and CDE regarding the integration of the facility and educational components of the program. The major topics of discussion were regarding the following:

- » Basic Program Components
- » Funding Provisions
- » Financial Hardship
- » Career Technical Education Program Evaluation
- » Eligibility Requirements
- » Application Process
- » Funding Cycles
- » Project Priority

Discussion regarding the CDE component of the program occurred at the October 6th meeting. The major topics of discussion were regarding the following:

- » Submission requirements
- » Application Review and Scoring Process
- » Elements of the Project Application, including:
 - *The Career Technical Education Plan*
 - *Projections of Student Enrollment*
 - *Identification of Feeder Schools and Partners*
 - *Accountability Plan*
 - *Educational Specification and Equipment/Space Requirements*
 - *Budget Justification*
- » Timelines for Review of the Application
- » Fund Release Information

For a more detailed summary of these components of the program, please read the discussion paper prepared for the CTEFP located on the OPSC's Web site www.opsc.dgs.ca.gov, under the State Allocation Board link, click on the Implementation Committee Agenda Item History link.

Status: A meeting including the CDE, Chancellor's Office of the Community Colleges, the Labor and Workforce Development Agency, and business and industry groups will take place on October 23rd, from 1:30 p.m. to 3:30 p.m. at the CDE to discuss the educational component of this program. Parties interested in attending the meeting should contact Mr. Fred Yeager at fyaeager@cde.ca.gov or 916.327.7148.

Continued discussion on this item will occur at the December 1st Committee meeting.

WATCH FOR...

Implementation Committee Future Discussion Items

The following items are scheduled to be discussed at the December 1, 2006 Implementation Committee meeting:

- » Continued discussion on the following provisions contained in Chapter 35, Statutes of 2006 (Assembly Bill 127):
 - *Career Technical Education Program*
 - *Overcrowding Relief Grant*
 - *Seismic Mitigation*
- » Implementation of Assembly Bill 607, Chapter 704, Statutes of 2006 (Goldberg).
 - *Discussion on the Emergency Repair Program and standards for good repair.*

THE NEXT MEETING...

The next Implementation Committee meeting is scheduled for:

- » Friday, December 1, 2006 from 9:30 a.m. to 3:30 p.m. at the Legislative Office Building, 1020 N Street, Room 100, in Sacramento.

Where Does All That Bond Money Go?

Beginning in November 2002, four years after the inception of the School Facility Program in 1998, two additional bonds have been approved by California voters, each significant in their own right in size and impact on the State. But as we know, numbers are only ink on a page, it's what those numbers represent that really causes great satisfaction... quality schools for California's students. So, legislators, school districts, consultants, professional designers, lobbyists, State employees, and every other taxpayer, where did your money go?

In summary, the following detailed list represents districts that have had the following projects funded out of the last two successful bond measures, Proposition 47 and Proposition 55:

- » 2,089 *new construction* projects with funding in the amount of \$8.3 billion
- » 3,238 *modernization* projects with funding in the amount of \$5.5 billion
- » 799 *critically overcrowded school* (COS) projects funded in the amount of \$3.5 billion
- » 31 *charter school* projects funded in the amount of \$336 million
- » 105 *joint-use* projects with funding in the amount of \$99.8 million

This represents a total funding of \$17.8 billion apportioned to districts statewide for California's children.
